

CISA Mito Sensor

Electronic locks
for fire doors

Security you can always keep an eye on.

The new **CISA Mito Sensor** lock provides **assisted access** on fire doors installed in passageways and emergency exits.

The lock's **electronic board verifies** if the handle is **enabled** or **disabled** to open from outside.

By connecting the LED to the lock, the **sensors** on the board will **signal** to the user if the door can be opened from outside or not.

The system is activated using the most common access solutions such as buttons, badges, keypads, etc.

When combined with the two-colour LED, the **status of the handle is always known**, and provides the user with immediate feedback on whether the door is open or closed.

The **MITO SENSOR** lock can be installed with CISA panic exit devices, offering a complete, efficient and personalised solution thanks to:

Non-handed design: used on both left and right hand doors; the hand can be selected by moving a small lever on the lock.

The opening time can be set by turning the selector located directly on the lock to any position between a minimum and a maximum reference.

Installation with either DC or AC power supply.

The lock is **CE certified** and tested for 200,000 cycles in accordance with reference standards.

The status of the door?

With Mito Sensor it is always known, thanks to the two-colour LED that signals whether access is possible or not.

Combined with fire doors and panic exit devices, CISA Mito Sensor is the best solution for passageways and emergency exits. And the status of the handle is always known.

Technical features

FEATURES

- Zinc-plated steel case and cover
- Zinc-plated steel 24 mm faceplate
- Zinc-plated steel latchbolt
- 9 mm square spindle
- Non-handed to match the door hand by means of a microswitch setting
- Mechanical hold open device, with handle operated by the key
- For installation on single or double-leaf doors
- 12V and 24V AC/DC power supply voltage
- Variable lock opening time from 3 to 30 s, adjustable by trimmer (factory set time: 10 seconds)
- Pre-set for connection to two-colour red/green LED
- Grade S durability for 200,000 cycles at 50 N

SUPPLIED AS STANDARD

- Cylinder fixing screws
- 1.5 m power supply cable

DOCUMENTATION AND COMPLIANCE

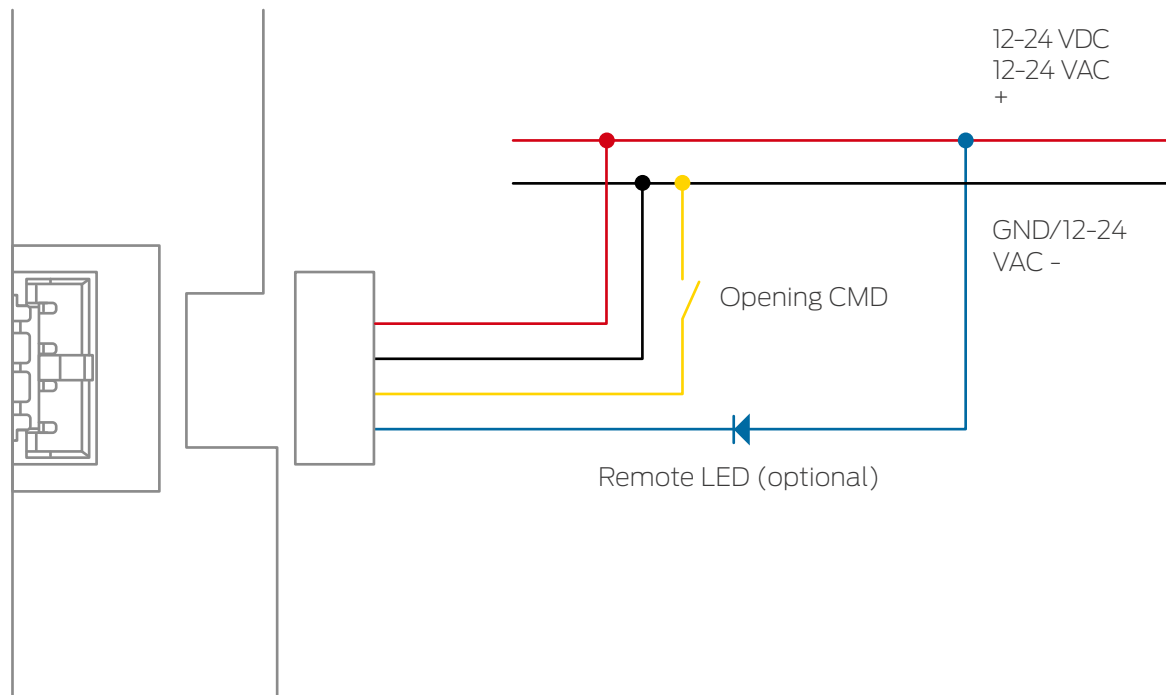

- Instruction sheet available using the QR Code
- Safety and Regulatory Addendum
- Declaration of Performance in compliance with the Construction Products Regulation (305/2011), available on CISA's website
- Declaration of Compliance with REACH regulations and RoHS Directive available on CISA's website
- Certificate of CE compliance in accordance with the Standard available on CISA's website
- Information on disposal available on CISA's website

ON REQUEST

- Panic exit devices (only for MITO SENSOR PANIC versions) CISA 1596XXXXX, 1597XXXXX, 15961XXXX
- Striker (see accessories section)
- Square spindle (see accessories section)
- Two-way two-colour red/green LED (see accessories section)

Wiring diagrams

Galvanically isolated opening contact (free contact).

ELECTRONIC LOCK OPERATION

- In Fail Safe locks (113205650 and 113215650), when power is removed, the handle is engaged; when power is applied, the handle is "idle".
- In Fail Secure locks (113105650 and 113115650), when power is removed, the handle is "idle"; when power is applied, the handle is engaged.
- The LED signal follows the diagram shown below:

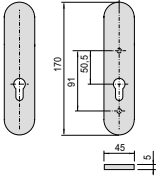

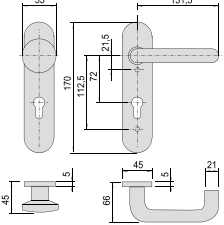

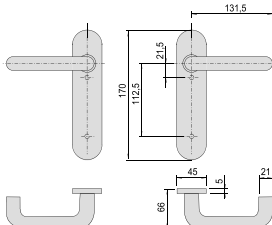

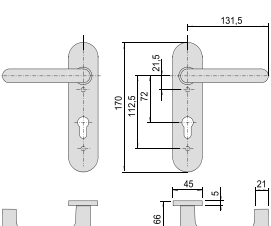

FALSE THROW NOT ENABLED	FALSE THROW ENABLED	
	ELECTRICAL IMPULSE	NO ELECTRICAL IMPULSE
GREEN LED	GREEN LED	RED LED

- After the opening signal has been given, the time the lock will remain open will vary between 3 s MIN and 30 s MAX.
